

# *requesting a quote*

When you ask us for a quote, it's helpful to know as much as possible about the job. We need to understand the printing specifications, such as how big you'd like the print to be, and how many you'll need. It's also helpful to understand how the final prints will be used, for example, will they be displayed outdoors?

Here's a guide to the questions we need answered:

## Print specifications

- 1 Size of finished or final print. For example 1000x2000mm
- 2 Number of prints required
- 3 Material you'd like to print on
- 4 Will any finishes, such as laminates, be required?
- 5 Does your print need mounting to a board? If so board type and thickness.

## Displaying your print

If you're unsure about what product to use, tell us how you intend to display the print and we'll suggest the best solution. We'll need to know:

- 6 Will the final print be displayed indoors or outdoors?
- 7 Is it going on a wall or window, or will it be displayed in another specific way?
- 8 How long do you expect it to last?
- 9 What will be the viewing distance?
- 10 How is the final print being installed?
